Information about Copyrighted Content

Some instruments administered for studies archived with ICPSR may contain in whole or substantially in part contents from copyrighted instruments. Reproductions of the instruments are provided as documentation for the analysis of the data associated with this collection. Restrictions on "fair use" apply to all copyrighted content. More information about the reproduction of copyrighted works by educators and librarians is available from the United States Copyright Office.

NOTICE WARNING CONCERNING COPYRIGHT RESTRICTIONS

The copyright law of the United States (Title 17, United States Code) governs the making of photocopies or other reproductions of copyrighted material. Under certain conditions specified in the law, libraries and archives are authorized to furnish a photocopy or other reproduction. One of these specified conditions is that the photocopy or reproduction is not to be "used for any purpose other than private study, scholarship, or research." If a user makes a request for, or later uses, a photocopy or reproduction for purposes in excess of "fair use," that user may be liable for copyright infringement.

Additional Measures	62

DOCUMENTATION FOR THE PUBLIC-USE SWAN VISIT 01 DATASET

CHANGES IN THE 2017 DATA REFREEZE:

- A variable describing the race of participants (RACE) was added from the Screener dataset. See the Additional Measures section at the end of the codebook for more information.
- The race/ethnicity of one participant was originally mislabeled and has now been corrected. Race fields now read Caucasian, not Black, for this participant.
- If the interview was not completed, but the Self-A was completed, AGE was calculated based on the date the participant filled in the Self-A Questionnaire.
- Variables STATUS1 and LMPDAY1 have been updated and are pulled from another source that evaluated the
 menopause status related variables over time, and corrected inconsistencies via additional corroborating
 information. PLEASE NOTE: STATUS1 has been changed from the prior release to split the surgical category
 into 'Post by BSO (Bilateral Salpingo Oophorectomy)' and 'Unknown due to hysterectomy.' See the Additional
 Measures section at the end of the codebook for more information.
- For the Interview dataset:
 - Job start and stop times (D3) were changed to military time format, and the AM/PM variables dropped.
 - o The partner/spouse job title variable PARTNJO1 was dropped
 - The interview language variable LANGUAG1 was renamed LANGINT1
- For the Self-Administered Questionnaire Part A, the following variable names were changed so there are no longer duplications with a different questionnaire items in the Annual Interview: FEARFUL1=FEARFULA1, and FAILURE1=FAILUREA1.
- The SWAN Follow-Up 01 Self-Administered Questionnaire Part B data were refrozen to address the following issue: 19 women either left the entire questionnaire blank or refused all items. Their forms should have been set to off protocol, and they should not have been included in the final frozen dataset. They have been removed, leaving a total of 2823 with Follow-Up 01 Self-B data.
- For Serum Hormone Measures dataset, the lower limit of detection (LLD) ranges have been updated. See the Additional Measures section at the end of the codebook for more information.
- In the physical measures section, self-reported weights were included for two participants.
- Spine Bone Mineral Density changed slightly for 50 participants due to incorrect application of correction factors

1. Who is included in the public use dataset:

The dataset contains the first follow-up visit information for 2,881 women of the 3,302 women from the 7 clinical sites participating in the SWAN longitudinal study. The sites include Boston, MA, Pittsburgh, PA, Oakland and Los Angeles, CA, Detroit, MI, Newark, NJ, and Chicago, IL.

2. How this codebook is constructed:

Following this documentation section are copies of each of the questionnaires that were used at the first follow-up visit. A list of additional variables is also provided. The questionnaires include the variables available for public use next to the question in bold red uppercase underlined letters. Those variables not available for public use have a # before the variable and are in blue. Any special notes are indicated with footnotes at the bottom of the page.

The assigned participant ID has been replaced with a randomly generated SWANID in order to protect participant privacy. The *baseline* interview date is denoted as day 0 and is used as the basis for all other dates. All other questionnaires or data collected that have a date attached have been converted to the number of days from the baseline interview. For example, if the Visit 1 Self-Administered Questionnaire Part A was collected a year after the baseline interview, the day for the Self-Administered Part A would be day 365 and the Interview would be day 0.

All variables for visit 1 have a 1 at the end of the variable name.

3. Missing data coding:

Missing codes are as follows: -1: not applicable, -7: refused, -8: don't know, and -9: missing.

4. Ways this data can be used and additional notes

Interview Questionnaire

The date of the specimen mentioned in A.15 is in the variable SPEDAY1. Several questions were added or changed with the 9/15/1997 version of the interview form, and these are detailed on the last page of the interview form in the codebook. Question C4 was asked as one question with six responses in the 9/15/1997 version, rather than six separate questions with a Yes/No answer in the original version. Question C10 was added, and contained the variables used to create the perceived stress variable. Question E5 had an additional response (response 8) added for the 9/15/1997 version of the form. An osteoporosis variable was created based on text fields in the other prescription medication questions.

- A social support score can be calculated from the questions in C.9.a-d after recoding them from a 1-5 range to a 0-4 range.
- o CES-D scores can be created from the questions in C.10 (C.11 in the 9/15/1997 version of the form).
- o A perceived stress score can be created from questions in C.10 in the 9/15/1997 version of the form.

Self-Administered Questionnaire Part A

- In general, any 'Other, specify' text field is not included in the dataset. The income question I.1 was condensed so that the income ranges were more broadly defined.
- o Current smoking is defined as anyone who answered 'yes' to question B.8 (SMOKERE1) and an answer greater than 0 for B.8.a (AVGCIGDA1). The created variable SMOKER1 is 'yes' for current smokers.
- SF-36 scores can be derived based on questions B.14-20 according to the SF-36 User's Manual. Responses may need to be reversed where necessary so that all items are positively scored, so that a higher value indicates better functioning. The Role-Physical scale uses the variables from question B.14a-d. The Bodily Pain Score is calculated from questions B.17 and B.18. Item recoding depends on whether both questions were answered or one of the items has missing data. After recoding, all the items are positively scored so that a higher score indicates less pain. The SF-36 Vitality Score is calculated from questions B.19a-d. Questions B.19.a and B.19.b should be reversed so that all items are positively scored; for the resulting index a higher score indicates greater energy (and less fatigue). The Social Functioning Score is calculated using questions B.16 and B.20. Question B.16 is reversed so that all items are positively scored; for the resulting index a higher score indicates better social functioning. The Role-Emotional Score is calculated using questions B.15a-c. All items are positively scored, so a higher score indicates better role-emotional functioning.

Self-Administered Questionnaire Part B

One participant completed the questionnaire after the Visit 1 cut-off date of January 31, 1999, and the variable FLGSABV1 indicates this.

Physical Measures

In addition to the variables on the form, BMI1 was also calculated as weight in kilograms divided by the square of height in meters.

Additional Measures

Additional variables

Menopausal status (STATUS1), last menstrual period day since baseline (LMPDAY1), and participant race/ethnicity (RACE) are also provided. See page the Additional Measures section at the end of the codebook for descriptions.

Date of completion and other date variables (INTDAY1, SAADAY1, SABDAY1, PHYDAY1, HRMDAY1, CVRDAY1, PROTDAY1, SPSCDAY1, HPSCDAY1, LMPDAY1, SPEDAY1, HYSTDAY1) are given in days from interview date at baseline. Note that for 5 participants, interview completion dates at baseline were not available and alternative dates were substituted either from the Self-Administered Questionnaire-A or Physical Measures completion dates at baseline.

Serum Hormone Measures

The visit 1 hormone results are included. Of special note is that the estradiol assay was run in duplicate. The average (E2AVE1) is the within-person arithmetic average of the two assays. A flag indicates if the estradiol results differed by > 10 pg/mL where one or both results <= 20 pg/mL. Hormone results below the lower level of detection (LLD- see table in the Additional Measures section) were recoded to an .L value.

Cardiovascular Measures

A flag (FLAGSER1) indicates that the lipids were measured on serum rather than plasma because plasma was not available. One participant had samples collected after the Visit 1 cut-off date of January 31, 1999, and the flag FLGCVRV1 indicates this.

Bone Mineral Density Measures

Five of the seven sites participated in the bone study – Detroit, MI, Boston, MA, Oakland and Los Angeles, CA, and Pittsburgh, PA. Total spine and total hip bone mineral density (BMD) measures are provided. The spinal BMDs of two participants were recommended for exclusion by the Principal Investigator, and the flag BMDFLG1 indicates this.

ASK RESPONDENT TO GATHER PRESCRIPTION MEDICATIONS SO THEY ARE WITHIN REACH. REMEMBER, DO NOT READ OUT LOUD ANY SCRIPT IN CAPITAL LETTERS.

I would like to begin the interview by asking you some questions about medications.

The medications you take, both those prescribed <u>and</u> from over-the-counter (OTC), can have a major influence on how well you feel, how you respond to events in your life, and the continued maintenance of your health. We want to know about any medications you have taken <u>since your last study visit.</u>

I will start by asking about any pills or medicines, including patches, suppositories, injections, creams and ointments which are <u>prescribed</u> by your doctor or other health care provider, that you have taken <u>since your last study visit</u>.

IF YES TO ANY, RECORD MEDICATION NAME IN THE SPACES PROVIDED	PRESCRIPTION DRUGS IF YES:

ADDITIONAL QUESTIONS FROM THE 09/15/1997 FORM VERSION

The following questions were only on the 09/15/1997 form version:

1580 participants answered this question at visit 1:

C4.	Which of the following best describes your	menstrual periods since your last study visit?	Have they:
	[HAND RESPONDENT CARD "C4"]	DESCPER1	

Become farther apart?	1
Become closer together?	
Occurred at more variable intervals?	
Stayed the same?	4
Become more regular?	
DON'T KNOW	

1626 participants answered this question at visit 1:

C10. I would now like to ask you about your feelings over the past two weeks. Tell me how often you have felt or thought this way. [HAND RESPONDENT CARD "C10" AND READ RESPONSE CATEGORIES]

	*[READ STEM INSTRUCTIONS]	Never	Almost Never	Sometimes	Fairly Often	Very Often
	In the past two weeks you have:					
* a.	Felt unable to control important things in your life? CONTROL1	1	2	3	4	5
*b.	Felt confident about your ability to handle your personal problems? <u>ABILITY1</u>	1	2	3	4	5
c.	Felt that things were going your way? YOURWAY1	1	2	3	4	5
d.	Felt difficulties were piling so high that you could not overcome them? PILING1	1	2	3	4	5

Question E5 had another response (response 8) added in the 09/15/1997 version of the form:

E5. How frequently do you have contact with the geographic region of the United States where you were raised or spent the significant part of your youth? [HAND RESPONDENT CARD "H" AND READ RESPONSE CATEGORIES]

Weekly	1

[†] This date is given in days since the initial baseline interview, which is day zero.

We have some questions that we are asking you to complete on your own. If anything is unclear to you, please feel free to ask questions. Study representatives are available and happy to help you. Please take as much time as you need with each question. It is very important to us that you complete the entire questionnaire. Please find the most appropriate response to each question and circle the number for the answer you choose.

Thank you for your participation in this important study.

We are interested in learning more about women's health during their 40's and 50's. This first set of questions ask about your health and use of health care. B1. In general, would you say your health is excellent, very good, good, fair or poor? (PLEASE CIRCLE ONE RESPONSE.) **OVERHLT1** Excellent 1 Good......3 Fair 4 Poor 5 Don't know --8 B2. Since your last study visit, how many different times did you stay in the hospital overnight or longer? ___ # TIMES **HOSPSTA1** B3. Since your last study visit, about how many times did you see or talk to a doctor, nurse practitioner or other health care provider, regarding your own health? (Do not count health care providers that you have seen during a visit for this study.) ___ # TIMES **MDTALK1** Since your last study visit, have you had: (PLEASE CIRCLE 1 FOR NO OR 2 FOR YES FOR EACH QUESTION.)

		NO	YES
B4.	A Pap Smear (a routine medical test in which the doctor examines the cervix)? PAPSMEA1	1	2
B5.	A breast physical examination (a doctor or medical assistant feels for lumps in the breast)? BRSTEXA1	1	2
B6.	A mammogram (an x-ray taken only of the breast by a machine that presses the breast against a glass plate)? MAMOGRA1	1	2

	<u>HLTHSER1</u>

This questionnaire covers material that is sensitive and personal. For some women, sexual activity is an important part of their lives, but for others, it is not. Everyone has different ideas on this subject. To help us understand how these matters affect women's lives and health, we would like you to answer the following questions from your own personal viewpoint. There are no right or wrong answers. Remember, confidentiality is assured. While we hope you are willing to answer all of the questions, if there are questions you would prefer not to answer, you are free to skip them. Please find the most appropriate response to each question, and circle the number for the answer you choose.

ADDITIONAL MEASURES COLLECTED

The following measures that were collected at Visit 01 have been included in the codebook:

SERUM HORMONE MEASURES

1. Variables for assays

Variable	Assay	Units
DHAS1	Dehydroepiandrosterone sulfate	ug/dL
E2AVE1 [*]	Estradiol (see important note below)	pg/mL
FSH1	Follicle-stimulating hormone	mIU/mL
SHBG1	Sex hormone-binding globulin	nM
<u>T1</u>	Testosterone	ng/dL

^{*} IMPORTANT NOTE: There were originally two estradiol result variables because estradiol was run in duplicate. E2AVE1 is the within-person arithmetic average of the two estradiol variables.

2. Flags and other variables

Variable	Meaning	Codes
CYCDAY1	Day of cycle	n/a
FLGCV1	Both Estradiol results are > 20 pg/mL and the within-subject coefficient of variation (CV) is > 15%.	0=no, 1=yes(flagged)
FLGDIF1	One or both Estradiol results ≤ 20 pg/mL and the difference between them is > 10 pg/mL.	
	Note: Differences were found between some of the Estradiol duplicate measurements. The following guidelines were decided upon: 1. If both E2 values>20 pg/ml, CV must be ≤15%. 2. If one or both E2≤20 pg/ml, the two E2 results must agree within 10 pg/ml.	
	DATA WITH THESE FLAGS SHOULD BE OMITTED FROM DATA ANALYSES, OR USED WITH CAUTION IF INCLUDED IN ANALYSES.	

3. Changes to the data:

• Lower limit of detection (LLD). Hormone results below the LLD were recoded to a value of '.L'.

LLDs changed over time. The following LLDs were provided by the lab and applied to all samples:

Hormone	Time Window on hormone measurement corresponding to LLD	Lower Limit of Detection
DHEAS	~ Sep. 15, 1997	<1.52 ug/dL (Initial value)
	Sep. 16, 1997 ~ Jan. 14, 1999	<0.304 ug/dL
	Jan. 15, 1999 ~	<1.5 ug/dL
E2	~ Feb. 20, 2000	<1.0 pg/mL (Initial value)
	Feb. 21, 2000 ~ Aug. 27, 2001	<2.0 pg/mL
	Aug. 28, 2001 ~ May 03, 2009	<4.0 pg/mL
	May 04, 2009 ~	<7.0 pg/mL
FSH	~ Aug. 05, 1999	<1.05 mIU/mL (Initial value)
	Aug. 06, 1999 ~ Nov. 10, 1999	<1.0 mIU/mL
	Nov. 11, 1999 ~ Jul. 19, 2000	<0.7 mIU/mL
	Jul. 20, 2000 ~ Oct. 29, 2002	<0.6 mIU/mL
	Oct. 30, 2002 ~ Sep. 28, 2003	<0.5 mIU/mL
	Sep. 29, 2003 ~ Feb 20, 2006	<0.4 mIU/mL
	Feb 21, 2006 ~	<0.8 mIU/mL
SHBG	~ Aug. 05, 1999	<1.95 nM (Initial value)
	Aug. 06, 1999 ~ Oct. 31, 1999	<1.9 nM
	Nov. 01, 1999 ~ Mar. 22, 2006	<2.0 nM
	Mar. 23, 2006 ~	<3.2 nM
Т	~ Jun. 04, 1998	<2.19 ng/dL (Initial value)
	Jun. 05, 1998 ~ Jun. 17, 1999	<2.2 ng/dL
	Jun. 18, 1999 ~	<2.0 ng/dL

CARDIOVASCULAR MEASURES

1. Variables for assays

Variable	Assay	Units
CHOLRES1	Total cholesterol	mg/dl
TRIGRES1	Triglycerides	mg/dl
LDLRESU1	Low-density lipoprotein cholesterol (estimated)	mg/dl
HDLRESU1	High density lipoprotein cholesterol	mg/dl
GLUCRES1	Glucose	mg/dl
INSURES1	Insulin	uIU/ml
FACRESU1	Factor VII	%
FIBRESU1	Fibrinogen	mg/dl
PAIRESU1	PAI-1	ng/ml
TPARESU1	tPA	ng/ml
LPARESU1	Lipoprotein Lp(a)	mg/dl
LPA1RES1	Lipoprotein A-1	mg/dl
APOARES1	Apolipoprotein A-1	mg/dl
APOBRES1	Apolipoprotein B	mg/dl
CRPRESU1	C-reactive protein	mg/l

2. Flags and other variables

Variable	Meaning	Codes
FLAGSER1	Flag to indicate that lipids were measured on serum rather than plasma because plasma was not available. Lipids for these subjects were <u>not</u> set to missing.	0=no, 1=yes
FLGCVRV1	Flag to indicate the sample was collected after the cut-off date for Visit 1 (01/31/1999)	0=no, 1=yes

^{*1=}yes means flagged

3. Changes to the data:

- Non-fasting Triglycerides, Insulin, & Glucose If women were not fasting, triglycerides, insulin and glucose were set to missing in the frozen data set because these assays are not valid for non-fasting samples.
- <u>Estimated vs. Direct LDL</u>. LDL is estimated using the Friedewald equation for all women with triglycerides below 400 mg/dl. If triglycerides exceed 400 mg/dl, LDL is set to missing.
- <u>Serum lipids</u>. A few subjects had their lipids measured from serum rather than plasma. The results were left as is but subjects were flagged (FLAGSER1=1).

BONE MINERAL DENSITY MEASURES

Five of the seven clinical sites did DXA bone scans on the spine and hip. The total bone mineral density scores had to be calibrated in order to apply machine change calibration correction factors.

Variable	Meaning	Codes
SPSCDAY1	Spine Scan Day	
SPSCTIM1	Spine Scan Time	
SPSCMOD1	Spine Scan Mode	5 = 2000 machine 11=4500 machine
HPSCDAY1	Hip Scan Day	
HPSCTIM1	Hip Scan Time	
HPSCMOD1	Hip Scan Mode	5 = 2000 machine 11=4500 machine
SPBMDT1	Total Spine BMD w/cross-calibration applied	
HPBMDT1	Total Hip BMD w/cross-calibration applied	
BMDFLG1	PI recommended for spine exclusion	0=no 1=yes

MENOPAUSAL STATUS MEASURES

Variable	Meaning	Codes
STATUS1	Menopausal Status	1 = Post by BSO (Bilateral Salpingo Oophorectomy)
		2 = Natural Post
		3 = Late Peri
		4 = Early Peri
		5 = Pre
		6 = Pregnant/breastfeeding
		7 = Unknown due to HT (hormone therapy) use
		8 = Unknown due to hysterectomy

STATUS1 represents menopausal status, and is pulled from another source that evaluated the menopause status related variables over time, and corrected inconsistencies via additional corroborating information. Menopause status is determined from questions on bleeding patterns, current hormone use, pregnancy, breastfeeding, hysterectomy, and oophorectomy. Menopause status is compared across visits, and no women were allowed to move backwards in status (e.g. early peri at Visit 08 could not be pre at Visit 09)

<u>Post by BSO</u> - women with both ovaries removed (Bilateral Salpingo Oophorectomy or BSO) prior to natural post menopause

Natural Post - women who had no bleeding in the 12 months prior to the visit

<u>Late Perimenopause</u> - women who had bleeding in the last 12 months prior to her visit but no bleeding in the past three months

<u>Early Perimenopause</u> - women who had bleeding in the last three months but who said their menstrual periods had become farther apart, closer together, more variable, or more regular

<u>Premenopausal</u> - women who reported bleeding in the past three months and who responded that their menstrual periods had stayed the same since their last visit

Pregnant/breastfeeding – women who reported a pregnancy since the last visit or are currently breastfeeding

<u>Unknown due to HT use</u> - pre- and perimenopausal women using hormones, including birth control pills, estrogen, and progestin, patches and a few vaginal hormones

Unknown due to hysterectomy – women who reported hysterectomy without BSO prior to natural post

<u>LMPDAY1</u> is the number of days from baseline (Day 0) to the date of the last menstrual period at Visit 1. It is pulled from another source that evaluated the menopause status related variables over time, and corrected inconsistencies via additional corroborating information

RACE/ETHNICITY

RACE: Participant race/ethnicity is provided from the Screener dataset:

Variable	Meaning	Codes
RACE	Race at Screener (Screener Q.33, modified)	1: Black/African American 2: Chinese/Chinese American 3: Japanese/Japanese American 4: Caucasian/ White Non-Hispanic 5: Hispanic
